Article number: 5001

Deep Clean

Deep Clean is an innovative pasty cleaning product that is mainly intended for use in combination with Hull Cleaner, Hull Cleaner Hard and/or Hull & Deck Cleaner Pro. The slightly abrasive effect of Deep Clean ensures that almost all soiling is removed from deep in the pores. Deep Clean also enhances the effect of the previously mentioned products when used in combination with Deep Clean.

Article number : 5002

Hull & Deck Cleaner Pro

Hull & Deck Cleaner Pro is an alkaline cleaning agent that easily and quickly cleans weathered, dirty teak and polyester surfaces. Hull & Deck Cleaner Pro easily removes contamination such as old wax layers from the hull. Hull & Deck Cleaner Pro is excellent to use in combination with Deep Clean. Suitable for use on polyester, chrome, stainless steel and other (metal) surfaces.

Article number : 5003

Hull Cleaner Hard

Hull Cleaner Hard is an effective cleaning agent, for the removal of hard stains, such as yellow tarnish, limescale, rust and rust streaks, and other hull and bottom soiling. Safe for polyester and painted surfaces if used as directed. Hull & Deck Cleaner Pro is also excellent to use in combination with Deep Clean.

Article number : 5004

Glass & Stainless Steel Cleaner

Glass & Stainless Steel Cleaner is an innovative and powerful cleaning agent with unique polishing ingredients for effortless removal of ingrained dirt, including corrosion, bird droppings, limescale and salt residues. Restores glass' surface clarity by polishing the surface. Ideal for windows and portholes.

Article number : 5020

Canvas Cleaner

Canvas Cleaner is specifically developed for cleaning canvas, cotton, linen, etc surfaces. Atmospheric pollution penetrates the fibres of the canvas and also forms a breeding ground in which algae and mould can grow. Canvas Cleaner loosens the contamination deep in the pores without damaging the surface. The product leaves no residue, as often happens when using ordinary soaps. After cleaning, the surface can be perfectly preserved using Waterproofing.

Article number : 5005

Hull Cleaner

Hull Cleaner is an innovative, concentrated cleaning agent with added preservation properties, developed especially for regular maintenance. It removes all kinds of dirt easily, leaving a spot and streak-free finish. Safe for polyester, teak, plastic, metals such as chrome, stainless steel and aluminium, as well as painted surfaces. Does not affect the wax layer. Perfectly suited for use in a maintenance programme.

Article number: 5006

Stain Remover

Stain Remover is a powerful oxidising cleaning agent for removal of ingrained dirt and weather stains from all kinds of exterior fabrics. Restores the original colour. Ideal for use on sails, vinyl, boat cushions, boat covers, sprayhoods and sail covers.

Article number: 5007

Anti Fouling Remover

Anti Fouling Remover is an absolutely safe, pasty, pH-neutral stripper for the easy removal of old antifouling layers (even 2-component systems). It contains no harmful acids, lyes, NMP, Methylene Chloride, DMSO, paraffin or other preservatives. Leave the product to penetrate for longer to remove multiple layers in one go. The Anti Fouling Remover does not dry out and can be left for 24 hours without damaging the surface. It can even be used in temperatures as low as 0 °C.

Article number : 5019

Surface Cleaner Wipes

Surface Cleaner Wipes are wear-resistant wipes that are ideally suited as pre-treatment for a surface to be treated with Marine Coat or Gel Coat Premium Protector. Surface Cleaner Wipes degrease the surface and remove possible cleaning agent residues that may have a strong adverse effect on the preservation system to be applied.

Article number: 5008

Teak Protector Clear

Teak Protector Clear is a transparent and high-quality protective agent for teak. It is based on the most innovative technologies. Offers long-term protection against the re-adhesion of dirt. It prevents soiling, drastically reducing the growth of algae. It also impregnates the wood, which makes it more durable and prevents deterioration. The top layer is also water and grease-repellent.

Article number: 5009

Teak Protector Classic

Teak Protector Classic is a coloured and high-quality protective agent for teak. It is based on the latest technology. It prevents soiling, drastically reducing the growth of algae. It also impregnates the wood, which makes it more durable and prevents deterioration. The top layer is also water and grease-repellent.

Article number: 5010

Synthetic Glass Protector

Synthetic Glass Protector is a high-quality protective agent for glass based on the most innovative technologies. It offers long-term protection from adhesion of dirt, corrosion, bird droppings, limescale, salt residues and other aggressive substances. Prevents the glass from becoming matt or dull. Has a strong water-repellent effect and offers long-term UV resistance. Resistant to all common household cleaning products. Ideal for windows and portholes and other glass surfaces.

Article number : 5011

Waterproofing

Waterproofing is a high-quality impregnating agent developed using the most innovative technologies. It is used to waterproof all kinds of textile fabrics. Offers long-term protection from weathering and adhesion of dirt. Does not affect the fabric and leaves a spot and streak-free finish. Ideal for use on sails, vinyl, boat cushions, boat covers, sprayhoods and sail covers.

Article number: 5012

Gelcoat Detailer Spray

Gelcoat Detailer Spray is a completely new synthetic gloss enhancer based on hydrophobic polymer technology. This creates a high surface tension and allows the water to run off the surface. Gelcoat Detailer Spray is an easy, safe detailer for cleaning, adding shine and protecting the surface. Gelcoat Detailer Spray is also a fantastic cleaner/sealant for glass, hard interior, uncoated and waxed surfaces.

Article number: 5013

Gelcoat Premium Protector

Gelcoat Premium Protector is a high-quality protective agent based on the most innovative technologies. It protects the gelcoat, gives a nice sheen and intensifies the colour, while also preventing the adhesion of dirt. With UV filter. Safe for polyester, plastic, painted and metal surfaces including chrome, stainless steel and aluminium.

Article number : 5014 & 5015

Marine Coat

Marine Coat is a unique high-gloss transparent protective system that has been specifically developed for the maritime sector. Marine Coat is a semi-permanent, film-forming protective system that can be applied to virtually all waterproof surfaces on and around boats and ships.

Article number : 5018

Gelcoat Speed Protector

Speed Premium Protector is a high-quality protective agent based on the most innovative technologies. Protects the gelcoat and provides extra shine and protection after washing. It also prevents the adhesion of dirt. Safe for polyester, plastic, painted and metal surfaces, including chrome, stainless steel and aluminium. Gelcoat Premium Protector is also excellent as part of standard gelcoat maintenance as well as for maintaining surfaces already treated with a Marine Coat.

Article number : 2021

RenoTop Marine 1-K

RenoTop Marine 1-K is a high-gloss 1-component oxidative drying polyurethane/alkyd varnish developed for the offshore sector. The coating has excellent flow properties and is easy to apply by brush, roller or sprayer. RenoTop Marine 1-K has excellent gloss retention properties and very low flame spread.

Article number: 5016

Power Protect

Power Protect is a protective agent for electrics. It forms an ultra-thin, flexible and water-repellent layer that prevents dirt penetration and combats corrosion. It has a powerful penetrating, moisture repelling and preservative effect. Helps prevent short circuits and rust formation on all metal components. The protective layer is non-insulating and can withstand extreme temperatures. Ideal for distributor caps, electric engines, equipment, switches and cables.

Article number: 5017

Bilge, Grey & Black Water Treatment

Bilge, Grey & Black Water Treatment is an enzyme-based product that converts contaminants in bilge, grey and black water tanks and prevents odours. The enzymes convert faecal matter and other contaminants in the tank, enabling the odour-free contents to be discharged safely. Can also be used during the winter to prevent odours from forming in boats. Does not affect hoses and rubber. 100% biodegradable.

Premium High Quality Yacht Care

The line.

The Impressed Pro Marine line is a premium line developed by Cleaning Care Products International B.V. (CCPI) specifically for maintenance of leisure craft, exclusive yachts and vessels. We used our many years' experience and expertise to develop a customised programme including innovative cleaning, protection and maintenance solutions for all kinds of yacht and vessel surfaces.

History.

During our almost 15 years in the cleaning and building sector, we have contributed to several extremely prestigious national and international projects. We have often been asked to use our expertise in the maritime sector, which has ultimately resulted in a customised, high-quality line of solutions for leisure craft, exclusive yachts and vessels.

Innovation.

CCPI is committed to using the most innovative and high-quality raw materials. This always results in advanced solutions with a strong focus on developing products that are user-friendly and green.

Maintenance programmes.

In addition to our innovative products, our maintenance programmes are formulated to guarantee that all surfaces look fantastic and remain in optimal technical condition. Our philosophy is that maintenance-free does not exist and that 'self-cleaning' is a utopia. And as every yacht or vessel is different, an individual approach to maintenance is required. We provide maintenance advice for all our projects, and this forms part of the guarantee system.

The objective.

The product line, maintenance programmes and training aim to ensure that your yacht or vessel is always in optimal condition. Your enthusiasm, combined with our expertise, makes the Impressed Pro Marine line the new standard in the maritime sector!
