

Gelcoat Premium Protector

Technical Data Sheet

Publication date: 9th of March 2021

Applications:

Gelcoat Premium Protector is a high-quality protective agent based on the most innovative technologies. It protects the gelcoat, gives a nice sheen and intensifies the colour, while also preventing the adhesion of dirt. With UV filter. Safe for polyester, plastic, painted and metal surfaces including chrome, stainless steel and aluminium.

Instructions for use:

1. Always shake the bottle before use.
2. Before getting started, make sure that the surface to be treated is clean and dry. Where necessary, use Hull Cleaner Hard or Hull & Deck Cleaner Pro in combination with Deep Clean for this purpose.
3. Then allow the surface to dry completely.
4. Wipe the surface with Surface Cleaner Wipes.
5. Then apply Gelcoat Premium Protector to the surface and distribute it evenly using a clean microfibre cloth.
6. Then allow the Gelcoat Premium Protector to form molecular cross-links for approximately 5-15 minutes.
7. Now thoroughly rub out Gelcoat Premium Protector with a clean, dry cotton cloth, microfibre sponge or washing glove.
8. Initially, Gelcoat Premium Protector may leave a slightly greasy film. It is therefore advisable to use Hull Cleaner to rinse after application.
9. This does not damage the applied protective layer, but it does prevent dirt from being attracted shortly after treatment.

Product usage:

Depending on the surface porosity, coverage can vary between approximately 30-60 m² per litre.

The above usage is indicative and should be determined by first applying to a small test area.

Considerations during application:

Always place a reference test on the to be treated surfaces in order to determine both adhesion and the technical and aesthetic result.

Specifications:

Appearance:	Liquid
Color:	Colorless to pale yellow
Scent:	Characteristic
Density:	Biologically optimal

Hazard symbols and H & P statements (CLP):

Gelcoat Premium Protector is not categorised in accordance with Regulation (EC) no. 1272/2008 (CLP). However, it is advisable to wear PPE at all times. Please consult the MSDS sheet for this.

Packaging and industrial waste:

Treat as industrial waste in accordance with the applicable regulations. Collect process water in accordance with the applicable local regulations.

This information is based on laboratory tests and practical experience. **For application and use, please adhere strictly to the descriptions in the technical product information sheets and MSDS sheets.** We do not accept any liability for any advice provided by us.
