

RenoTop Marine Floor

Technical Data Sheet

Publication date: August 26nd 2022

Application:

Renotop Marine Floor is a well-rounded, medium-duty coating offering improved longevity, strength, performance and pot life.

On account of its superior mechanical properties, this product is suited to a wide range of floors with various levels of mechanical exposure. It is recommended for use on industrial floors, car parks, workshops, warehouses, factories, showrooms, hangers, garages, service centres, back of house areas and laboratories, shipdeck and offshore.

Renotop Marine Floor features a non solvent formula and therefore has a lower environmental impact. With its improved levelling properties and self-smoothing nature, the application of this coating is a fast and efficient process. The product can also be used directly on well-prepared surfaces.

Considerations during application:

- Always conduct a reference test on the surfaces that require treatment, to evaluate both the adhesion and the aesthetic result.
- The surface should be completely dry and clean when the product is applied.
- This product should be used at a maximum relative humidity of 85% and an outdoor temperature of at least 10°C.
- The temperature of the surface that requires treatment should be at least 1°C above the dew point.
- Do not apply this product in direct sunlight or on a hot surface > 25°C, or on surfaces directly exposed to the wind.

Instructions for use:

Before application and implementation of Reno Top Marine Floor individually or as part of a system is a thorough project inspection, written project advice and RFP from our technical adviser and R & D department is necessary.

Specifications:

Appearance:	Liquid
Color:	Various colours.
Flashpoint:	26 degrees Celsius

Hazard symbols and H & P statements (CLP):

Consult the MSDS of the relevant components for the hazard symbols and H & P phrases. Ensure adequate ventilation during the application and drying time. Avoid contact with the skin and eyes by means of suitable personal protective equipment (PPEs) such as gloves, safety goggles, suitable footwear, protective creams and similar. Also refer to the instructions on the packaging and/or MSDS.

Safety aspects: consult the safety data sheet.

Hazard Class (transport): consult the safety data sheet.
